

FASCINATE Workshop

Frontiers of Atmospheric Science and Chemistry:

Integration of Novel Applications and Technological Endeavors

Key Information:**Workshop:**Sept. 9th -11th, 2019**Python Tutorial:**Sept. 12th, 2019**Where:**NCAR, Center Green,
Boulder, Colorado**Registration:**<https://www.regonline.com/fascinateworkshop>**Description:**

Join us in Boulder, Colorado for an interdisciplinary workshop exploring the cutting edge in atmospheric science and chemistry. The first three days will bring together experts in novel uses of satellite data, advanced statistics and machine learning as well as linking air quality and health. The final day adds on an optional python tutorial on machine learning.
